REQUEST FOR EXTENSION OF DRILLING REQUIREMENT UNDER GEOTHERMAL STEAM LEASE DGP

ML 31117
Phillips Petroleum Company, operator under the geothermal steam lease listed above, has requested a five-year extension in which to commence drilling operations under this geothermal steam lease. This lease was issued March 10, 1975, for a term of ten years. Section 10 of these lease provides as follows:

10. Development of Leasehold Estate: Lessee agrees to commence drilling operations on a well at an appropriate location within the leasehold estate within five (5) years from the date hereof, and to prosecute the drilling with reasonable diligence until products are discovered in sufficient commercial potential, or to a depth below which further drilling would be unprofitable in the written opinion of the Lessee issued to the Lessor. Such five (5) year period may be extended by the Lessor for a period not to exceed five (5) years upon written application by Lessee showing good cause therefor not more than ninety (90) days nor less than thirty (30) days prior to expiration of the initial five (5) year period. At any time within said five (5) year period, Lessee may surrender its rights under this lease and agreement. Lessee also shall have the right to drill such well or wells on the leasehold estate at such location or locations deemed desirable by Lessee upon thirty (30) days notice in writing, which location or locations shall not unreasonably interfere with rights of holders of lease or leases and special use permits from the State of Utah. No well shall be drilled within 100 feet of the boundary line of the leasehold nor within 100 feet of any building on the surface of the leasehold without written permission of the Lessor.

Phillips Petroleum Company has been active in geothermal exploration in Southwestern Utah; and these lease are part of a larger block of State, Federal, and private lands being explored by Phillips Petroleum Company.

It is the Staff's feeling that Phillips Petroleum Company has been diligent in conducting geothermal exploration on the lease listed above along with other lands held by that company. Upon recommendation of Mr. Prince, the Director approved their request and the requirement for filing the plan of development be extended to July 12, 1980.

REQUEST FOR EXTENSION OF TIME TO COMMENCE DRILLING OF THE SECOND TEST WELL IN THE WEST ROZEL UNIT. DBP

The West Rozel Unit Agreement was approved by the Board of State Lands on November 13, 1978. One of the provisions of this unit is that

> within six months after the completion of a well capable of producing unitized substances in paying quantities, the unit operator shall submit for approval of the Director an acceptable plan of development and operation for the unitized land.

Paragraph 10 further provides in part

> the Director is authorized to grant an extension of the six-month period herein prescribed for submission of an initial plan of development where such action is justified because of unusual conditions or circumstances."

Amoco Production Company commenced the drilling on their West Rozel Point No. 2 on May 26, 1979. This well was drilled to a total depth of 2,704 feet and encountered production of a low gravity crude in what Amoco considered in paying quantities. This well was shut in and the drilling equipment moved off the location on July 12, 1979. Because of the low gravity of the oil and the high sulfur content, Amoco Production Company is now conducting studies to determine the productive potential of this unit area. They have also recently conducted more detailed seismic work on and around this unit, and the results of this geophysical activity are currently being reviewed.

Since it will be impossible for Amoco to spud a new well on this unit by January 12, 1980, they have requested a six-month extension for filing their plan of development; therefore, upon recommendation of Mr. Prince, the Director approved this request be approved and that this requirement for filing the plan of development be extended to Julay 12, 1980.
