## Step 5 Check the *Limited Assets Offering* checkbox

### Buyer Registration

Please read this information carefully before completing the registration form below to proceed with your registration as a buyer.

Users may register to participate either in EnergyNet's private sector auctions for oil and gas interests, or in Federal and State Government offerings, real estate, renewable energy, and other commodities listings. In accordance with SEC and FINRA regulations, users who wish to participate in private sector auctions for oil and gas interests are required to certify that they are accredited investors with industry experience. Users who are unable to meet these requirements may not proceed with registration.

To view auctions, you are only required to complete this registration form.

If you wish to register as a buyer, or if you register as a viewer and later wish to participate in bidding, you will be required to agree to the EnergyNet Buyer's Agreement to Purchase Properties and submit your bank information to apply for a bid allowance. You may submit your agreement or bank information any time after completing this registration process by logging in and following the instructions on your Buyer's Home Page.

Please note: Due to SEC regulations, you may be restricted from bidding on private sector oil and gas interests that began their due diligence period prior to your account registration. These restrictions do not apply to EnergyNet's Federal and State Government sales; Government sales may be subject to additional agency requirements.

The information you provide here will be used along with your bank information and information you provide on the Buyer's Agreement to establish your bid allowance. EnergyNet reserves the right to deny your registration or application at its sole discretion. For information regarding the types of information we collect and the implications to your privacy, please review our detailed policy in our statement on the Privacy of Consumer Financial Information.
